

DODGE · FOUR-WHEEL DRIVE · SINCE 1946

POWER WAGON

Eighty years of the go-anywhere truck — and one built to carry the whole story.

THE HISTORY · the army truck the boys wrote home about

A Dodge WC command car in a shattered town — the ancestor of every Power Wagon.

01 · BORN IN WAR

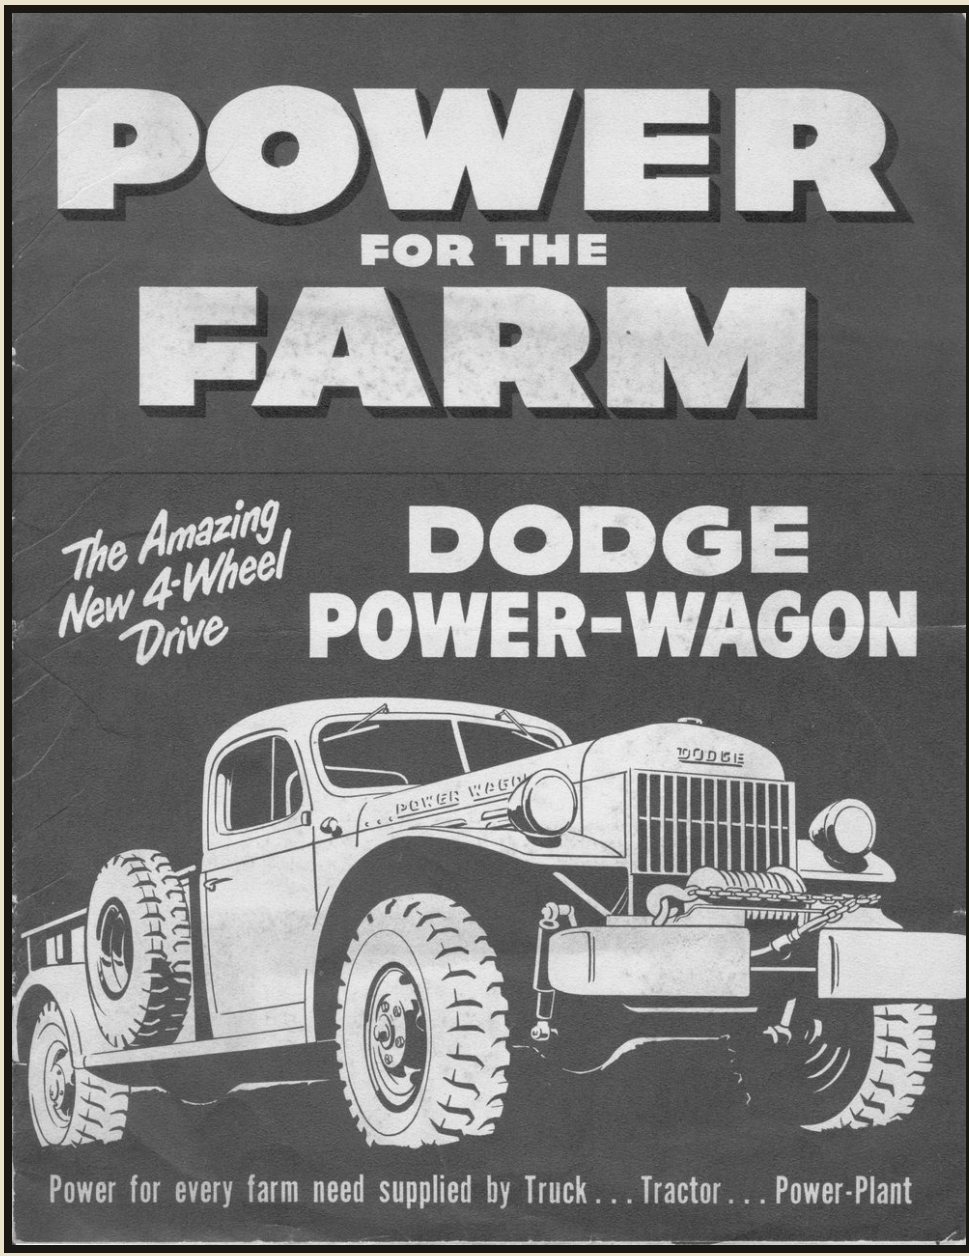

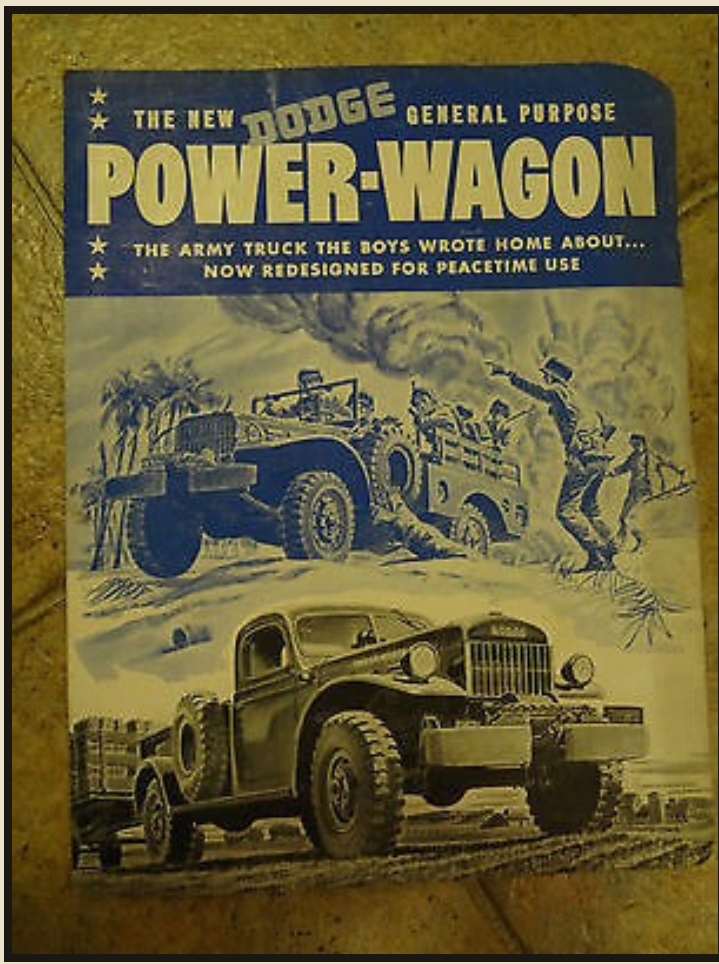

THE TRUCK THAT WENT TO WAR

Dodge built the WC-series three-quarter-ton trucks that would go anywhere and never quit — and the GIs who drove them overseas never forgot them.

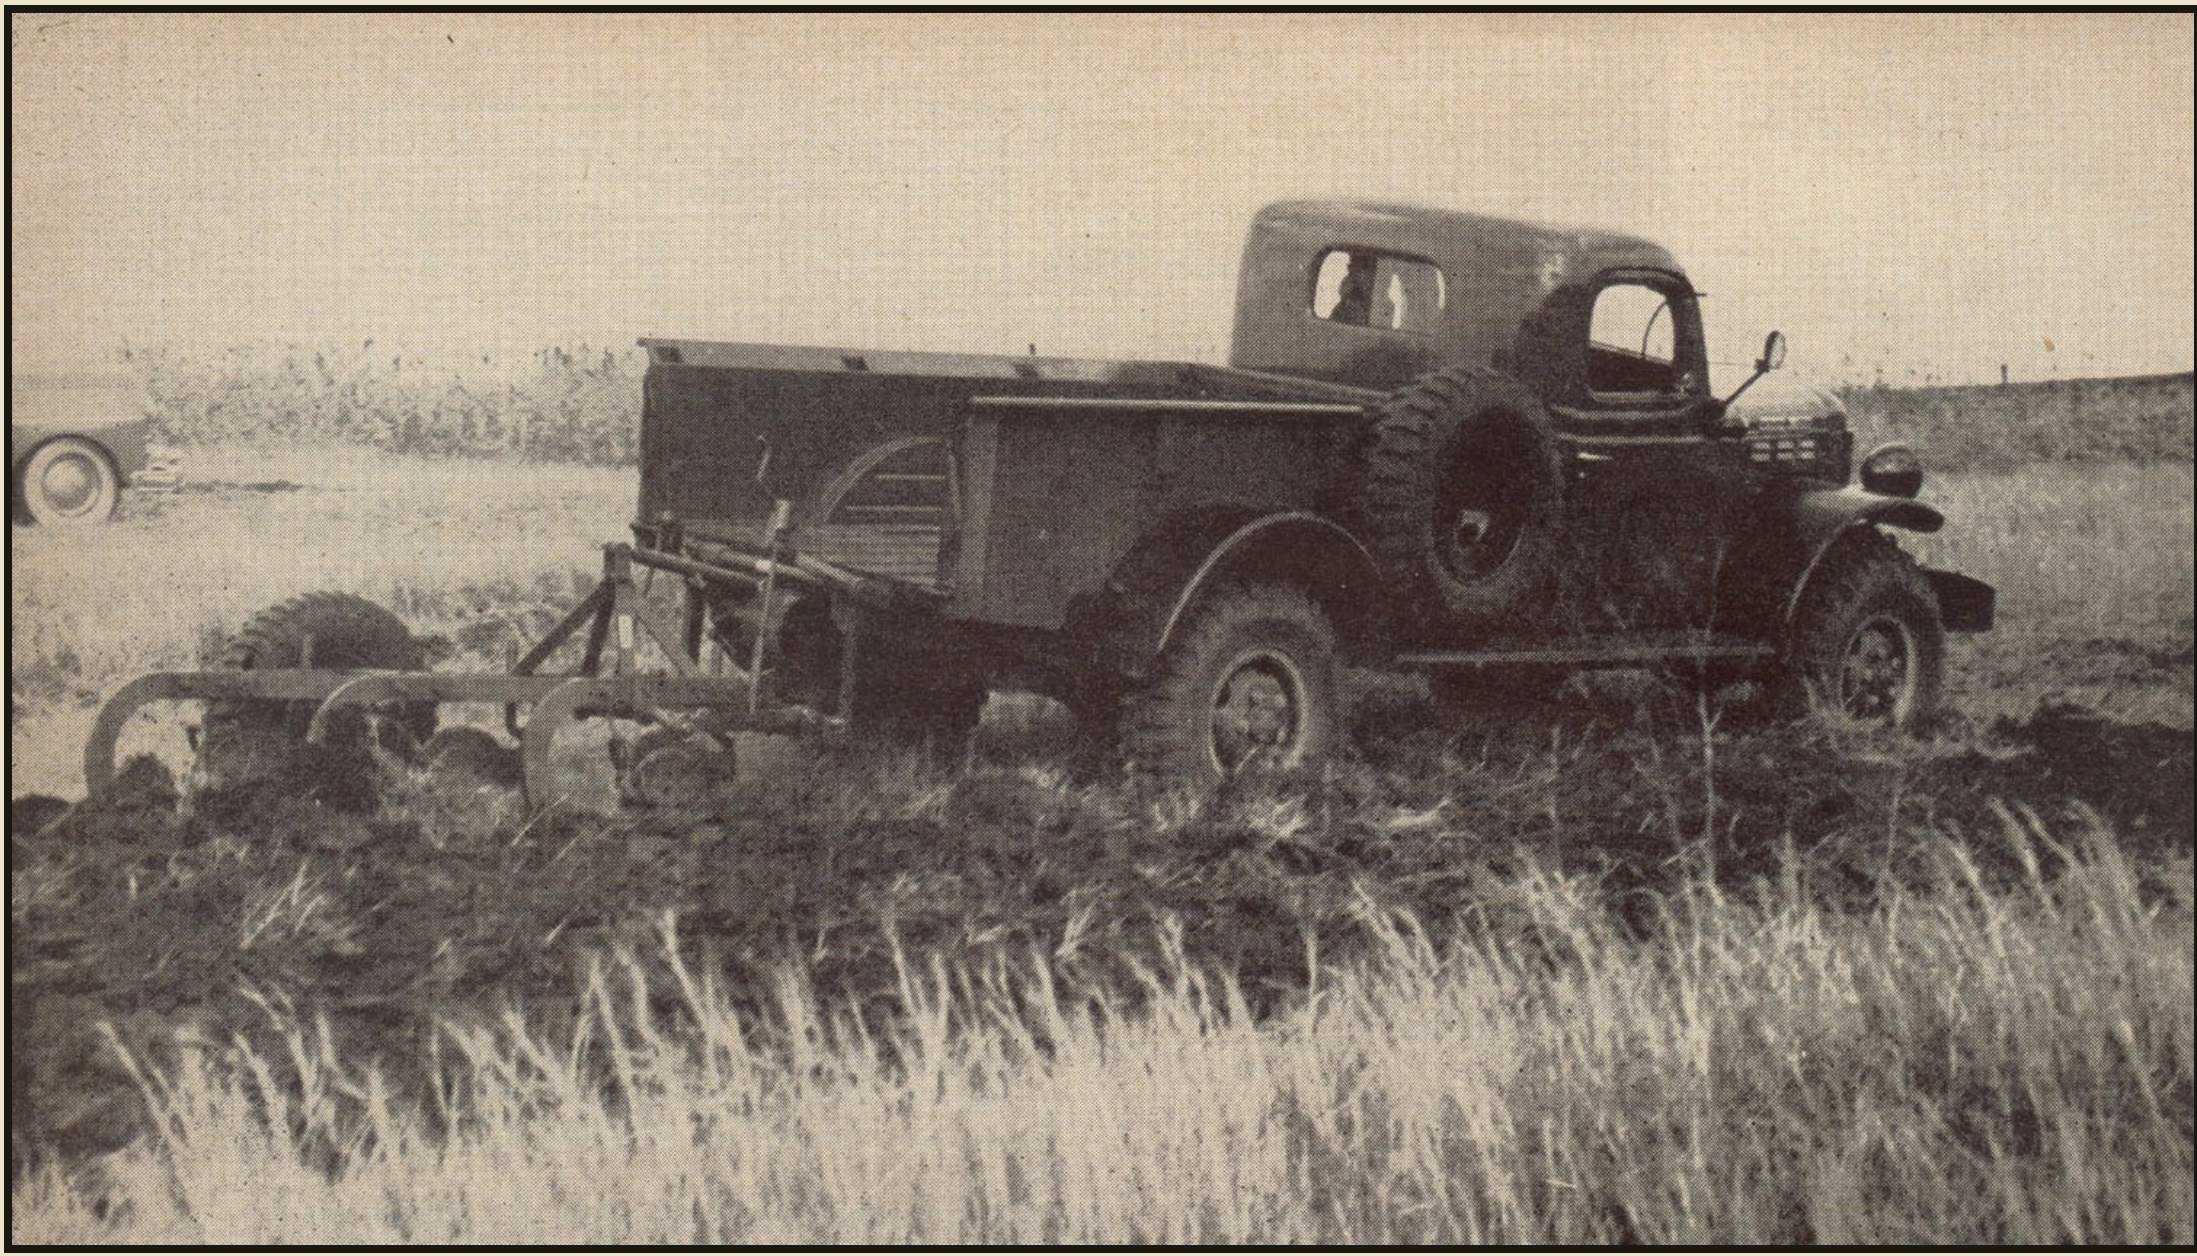

02 · THE BOYS WROTE HOME

“WHERE CAN I BUY ONE?”

Farm boys wrote to Dodge asking for a civilian version. In 1946 Dodge answered with the Power Wagon — the first four-wheel-drive truck an ordinary buyer could drive off the lot.

“Power for the Farm” — sold as truck, tractor & power plant.

Breaking ground on four-wheel drive.

Power take-off ran a post-hole auger.

The “Job-Rated” L-head power plant.

INTRODUCED	ENGINE	POWER	DRIVE	US BUILD	POWER TAKE-OFF
1946 WDX	230 cu in six	~94 hp	First civilian 4×4	1946–1968	front · ctr · rear

EIGHTY YEARS OF SERVICE								
1940	1946	1957	1968	1978	1980s	2005	2021	NOW
WC series goes to war	Power Wagon reaches the public	Crew cabs enter the catalog	US civilian sales end	Last export builds	Still serving worldwide	The name returns on the Ram	75th anniversary edition	This truck, carrying the story

THE BUILD · nautical blue metallic · 1940s body, 2022 capability

Custom flat-fender coachwork, widened to a four-door crew cab, in Nautical Blue Metallic.

THE CONCEPT

1940S BODY, 2022 CAPABILITY

A 2022 Ram 2500 Power Wagon Crew Cab, reimagined as a 1940s flat-fender Power Wagon while keeping the modern Ram chassis, drivetrain, and four-wheel-drive capability underneath — it looks like the truck the GIs brought home and drives like a current heavy-duty 4×4.
