

DODGE · FOUR-WHEEL DRIVE · SINCE 1946

POWER WAGON

Eighty years of the go-anywhere truck — and one built to carry the whole story.

THE HISTORY · the army truck the boys wrote home about

01 · BORN IN WAR

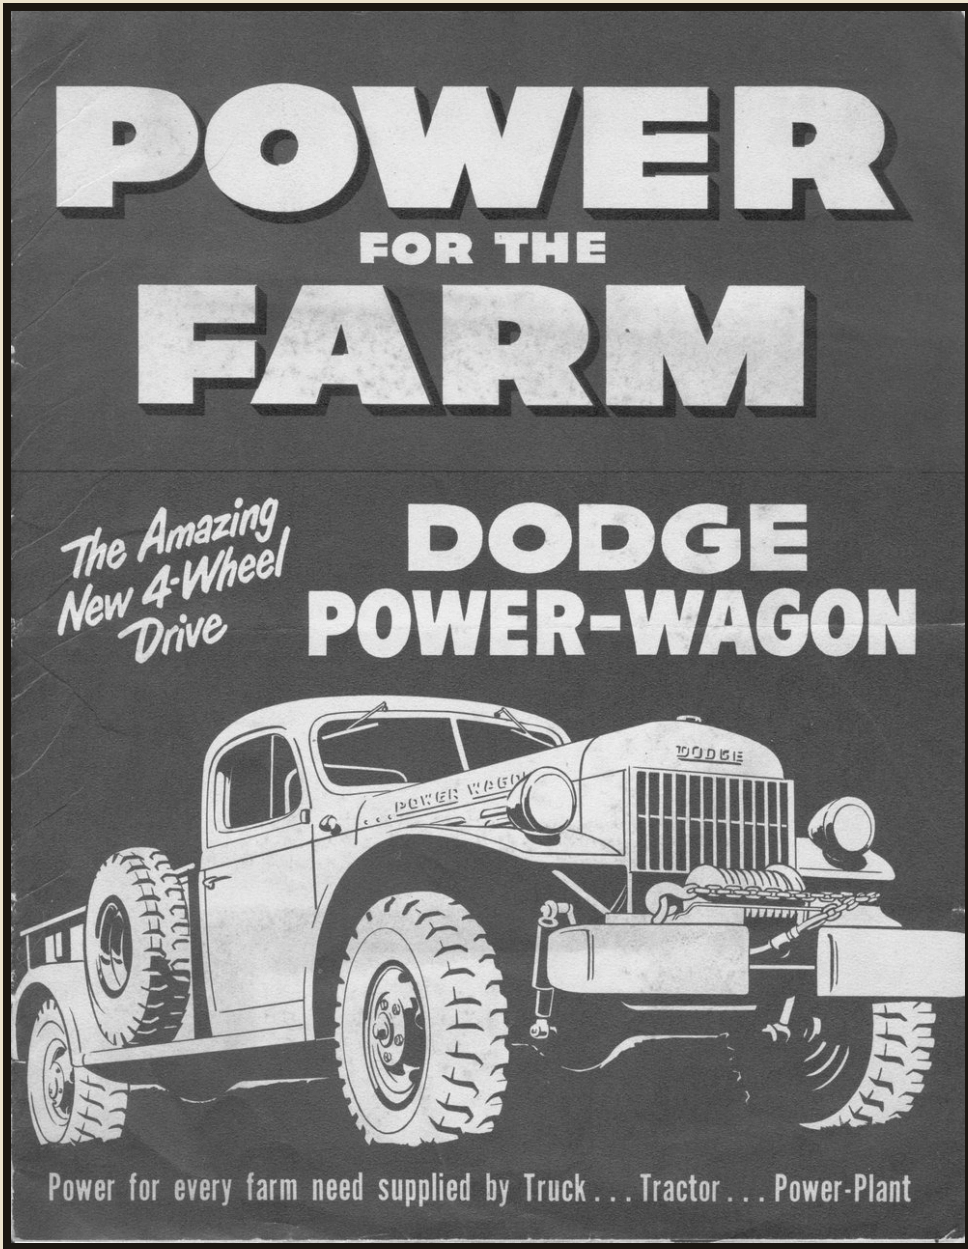

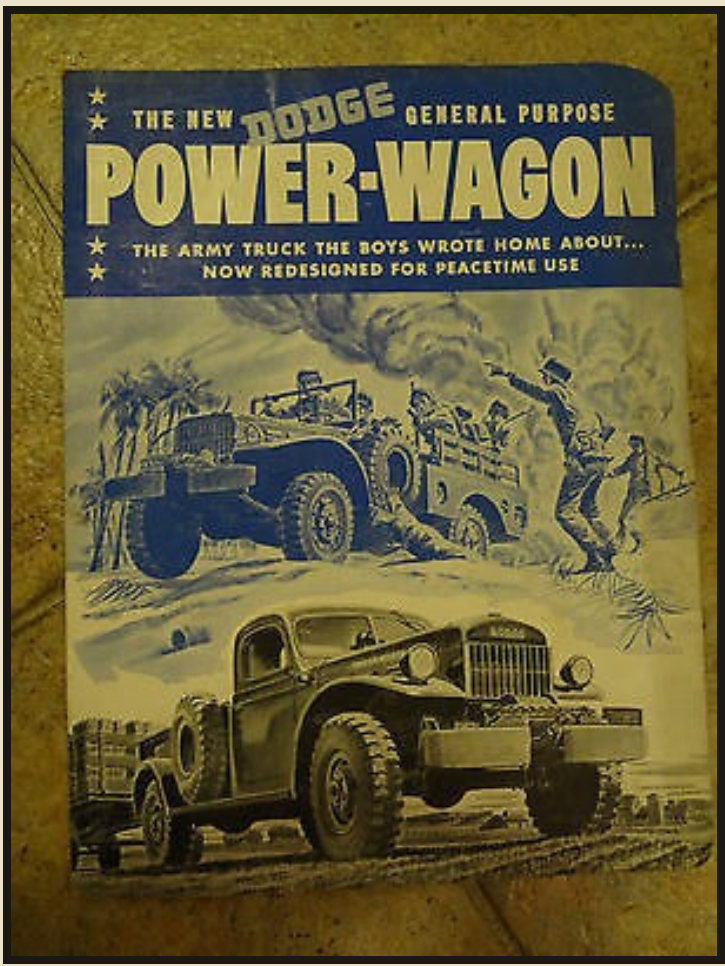

THE TRUCK THAT WENT TO WAR

Dodge built the WC-series three-quarter-ton trucks that would go anywhere and never quit — and the GIs who drove them overseas never forgot them.

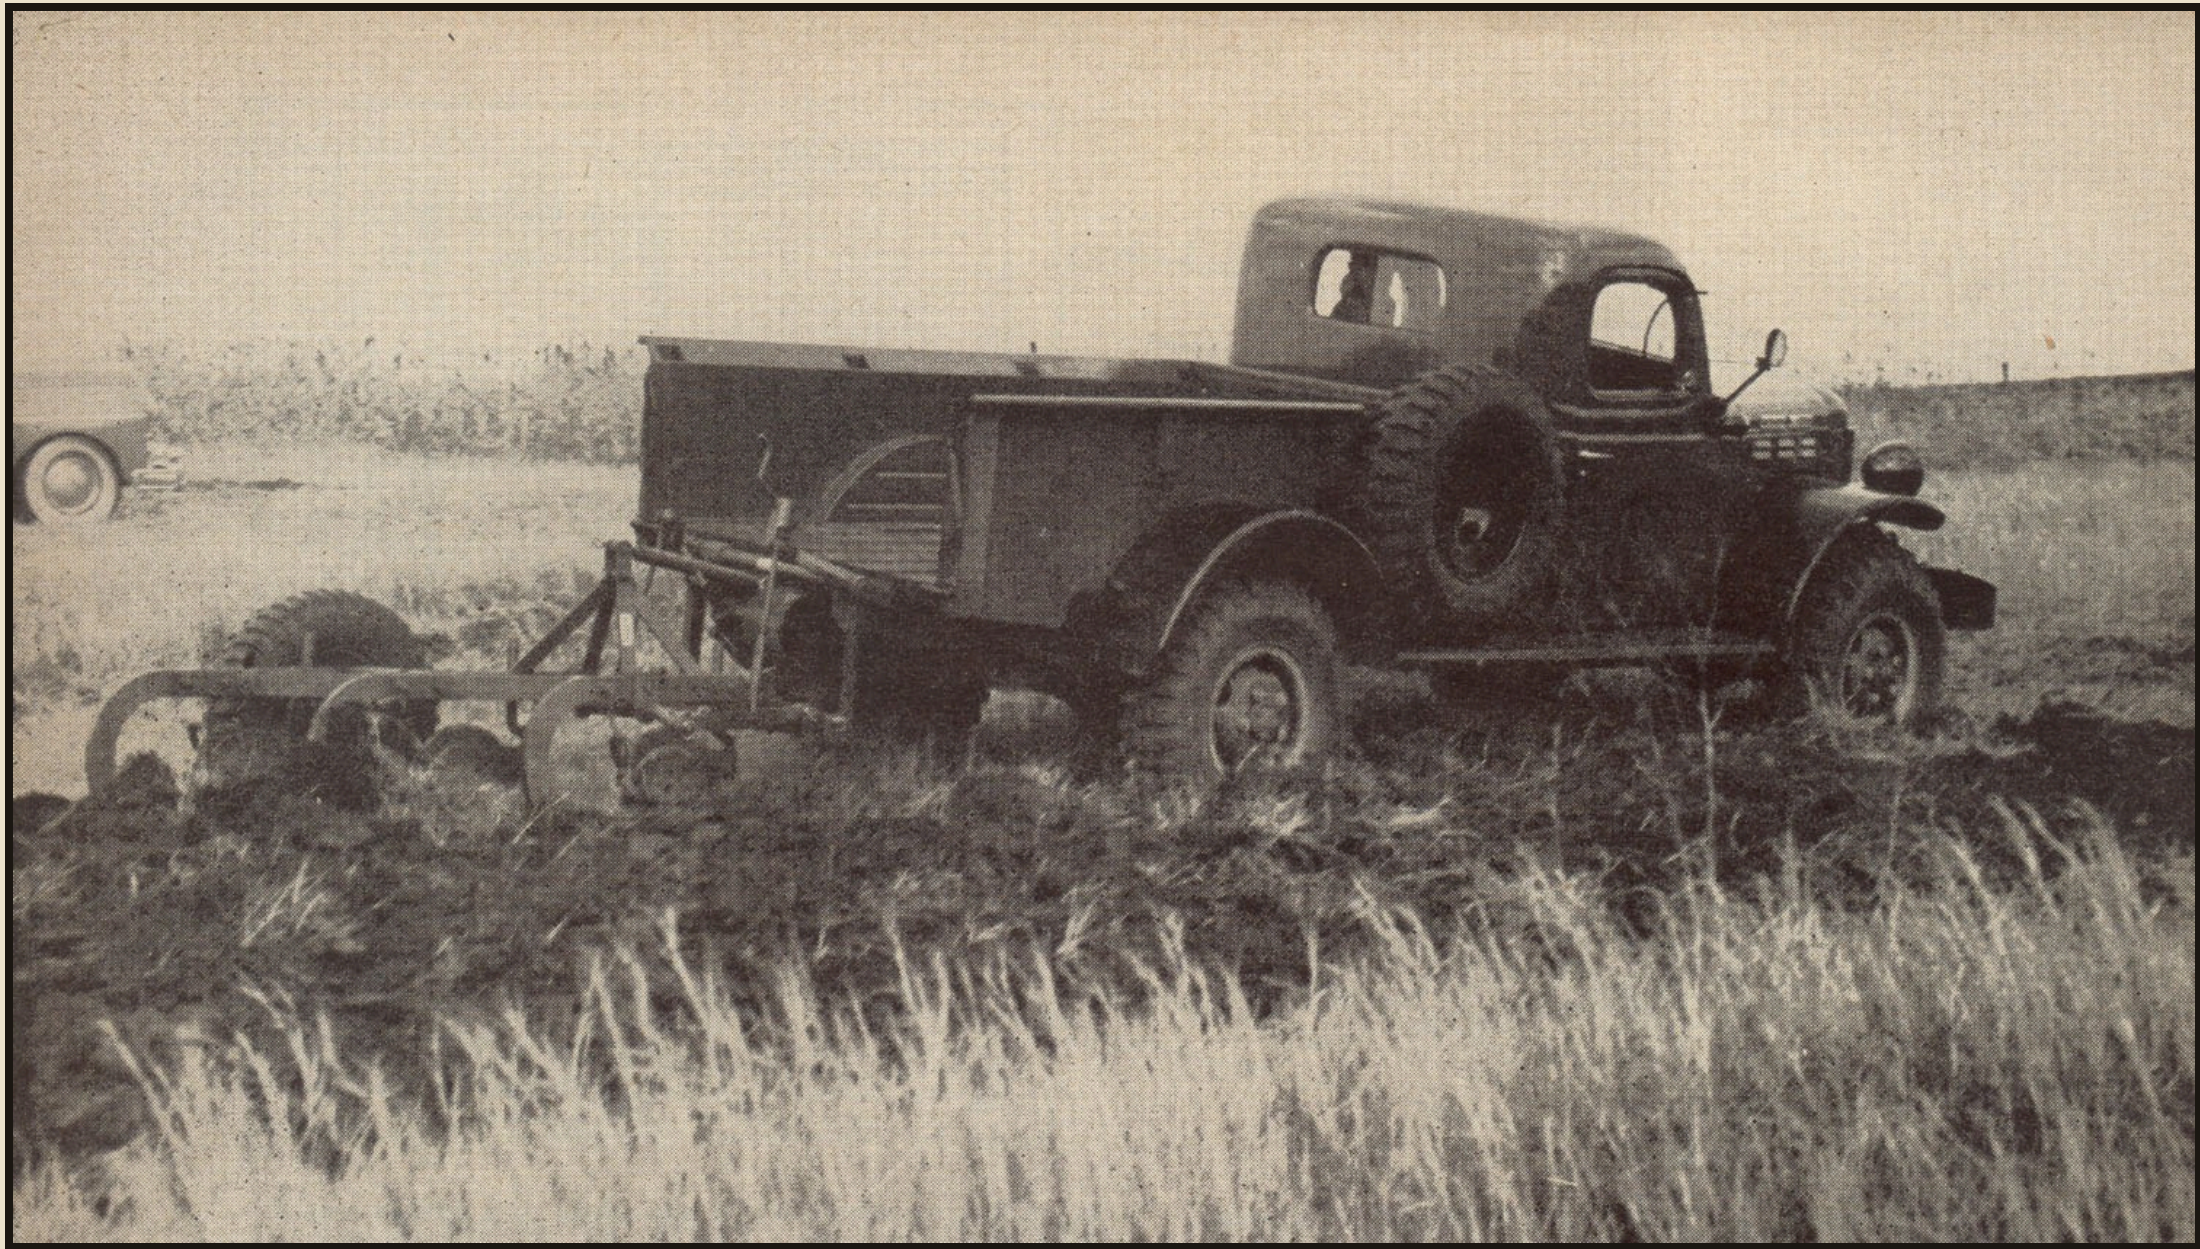

02 · THE BOYS WROTE HOME

“WHERE CAN I BUY ONE?”

Farm boys wrote to Dodge asking for a civilian version. In 1946 Dodge answered with the Power Wagon — the first four-wheel-drive truck an ordinary buyer could drive off the lot.

“Power for the Farm” — sold as truck, tractor & power plant.

Breaking ground on four-wheel drive.

Power take-off ran a post-hole auger.

The “Job-Rated” L-head power plant.
